iPod 2nd Generation Rear Panel Replacement

Written By: iRobot

INTRODUCTION

The shiny rear half of your iPod case.

TOOLS:

- iFixit Opening Tools (1)

Step 1 — Rear Panel

- Before opening your iPod, ensure that the hold switch is in the locked position.

Step 2

- Opening the iPod can be challenging. Don't get discouraged if it takes a few tries before the iPod is opened.
- Insert a plastic iPod opening tool in the seam between the white plastic front and metal back of the iPod. Once you've inserted the tool, run it along the seam to free the five tabs holding the iPod together.

Step 3

- Continue to run the opening tool along the side of the case until all five tabs have been released.

Step 4

- Work around the corner of the iPod and release the two tabs holding the iPod together near the dock connector.

Step 5

- Free the five tabs holding the iPod together on the other side. You may be able to free the tabs by gently wiggling the front panel of the iPod.

Step 6

- Lift the rear panel away from the iPod, making sure it doesn't catch on the headphone jack.

To reassemble your device, follow these instructions in reverse order.
